SUMMARY

Computer Science student at York University with hands-on experience in full-stack web development. Full-Stack Engineer at Circe, building **React** and **TypeScript** frontends alongside RESTful APIs with **Python**, **FastAPI**, and **PostgreSQL**. Proficient in building scalable web applications with a focus on security, maintainability, and intuitive user experiences.

EDUCATION

York University

Bachelor of Applied Science – CSSD

Markham, ON

Expected Apr. 2028

- **Relevant Coursework:** Data Structures & Algorithms, User Interfaces, Software Design, Object-Oriented Programming, Intro to Cloud.

EXPERIENCE

Fullstack Engineer

Dec 2025 – Present

Circe – Contract Part-Time

- Collaborated with **6+ contributors** on a production **React Native app**, resolving merge conflicts and maintaining code quality.
- Built and hardened a **REST API** with **FastAPI** and **PostgreSQL** for secure, scalable user profile management, resulting in reliable authentication and **robust data protection**.
- Coupled client-side software to internal systems via **TypeScript API client** and custom **React hooks**, handling loading, error, and update states, which improved real-time data accuracy and **user experience**.
- Engineered **5 authentication flows** (sign-in, sign-up, confirmation, password reset, forgot password) with robust validation and real-time error messaging, enhancing **account security** and reducing **user errors**.
- Refactored **2,000+ lines** across **8+ files** for **reduced duplication** and **streamlined development**, which simplified maintenance and enabled faster feature updates.

PROJECTS

jamSpace | *Python, Flask, HTML, CSS, JavaScript*

- Developed a full-stack productivity web application using **Flask** and modular **Blueprint architecture** for **scalable route management**.
- Refactored and unified **600+ lines** of legacy calendar code, merging weekly/monthly views into a **single planner**.
- Removed **5+ obsolete files** and reduced codebase clutter by **1,000+ lines** via systematic cleanup.
- Enhanced **UI/UX** with custom CSS/JavaScript for **responsive design**, modals, and advanced animations.

PixelCraft | *Java, Bash, OOP, CLI, HTML, CSS*

- Developed a modular image processing tool supporting batch transformations with **8+ filters** (grayscale, blur, flip, high contrast, negative, red channel, rotate, vibrancy), processing **1,000+ images** in testing.
- Designed extensible **OOP** architecture using **Java Reflection** for dynamic filter selection and rapid addition of new effects.
- Implemented a **command-line interface** and **10+ Bash scripts** for flexible usage and **100% automated batch workflows**.
- Processed **PNG images** and automated file management for efficient, large-scale operations.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, TypeScript, HTML5, CSS, Bash

Libraries & Frameworks: React, FastAPI, Astro, Svelte, Three.js, Flask, TailwindCSS, Formik, Yup, Jinja2

Databases: PostgreSQL

Tools & Platforms: Git, GitHub, AWS, Docker, VS Code, Linux, GitHub Actions

AI & Automation: GPT-4o, Claude Sonnet 3.5, Copilot
